EDUCATION

Baruch College (CUNY), Zicklin School of Business

Bachelor of Business Administration (BBA), Computer Information Systems
STEM program | Computer Science minor | GPA: 3.5 | Dean's List: 2025-2026

New York, NY
Expected May 2027

SKILLS

Programming and Web: Python, SQL, TypeScript, React, FastAPI, REST APIs

Data and Analytics: pandas, NumPy, PostgreSQL, pgvector, BigQuery, Tableau, Power BI, Excel, HubSpot CRM

AI and ML: Generative AI (GenAI), scikit-learn, Hugging Face Transformers, LangGraph, Claude API

Engineering: Git, Docker, Kubernetes, AWS, Vercel, CI/CD (GitHub Actions), pytest, Pydantic, Claude Code, Codex

Methods and Delivery: Process improvement, data validation, model evaluation, stakeholder communication, user training

Spoken Languages: English, Spanish, Russian (fluent)

EXPERIENCE

Ardinall Hedge Fund, AI Engineer (Project-based) | New York, NY

Jun 2026 - Aug 2026

- Built a private tool to reconcile profit and loss (P&L) reports from Eclipse and Redwood across different file formats.
- Delivered technical demonstrations of the P&L reconciliation tool to the CFO and trained users to interpret its outputs.
- Automated bank statement conversion from PDF to Excel using Python, LangGraph, and Claude, with data validation and duplicate checks.
- Added prompt-injection defenses, upload restrictions, and human-in-the-loop workflows for bank statement review.

GHA (M&A Advisory), AI Solutions Architect (Contract) | New York, NY

Mar 2026 - Jun 2026

- Automated email outreach for 15,000+ contacts using large language models (LLMs) and HubSpot CRM, reducing manual messaging time 90%.
- Demonstrated CRM automation and trained 3 nontechnical stakeholders to independently manage segmentation, tagging, and outreach across 45,000+ records.
- Conducted A/B testing of outreach emails, comparing recipient engagement across different message versions.
- Improved CRM data quality by correcting processing errors that could overwrite 20,000+ existing records.

Columbia University Irving Medical Center, Data Analytics Intern | New York, NY

Jun 2024 - Sep 2024

- Optimized ETL pipelines that collect and prepare clinical data for analysis, reducing processing time 30%.
- Built Tableau dashboards and reports for business intelligence (BI) and data visualization, supporting 2 senior leaders in weekly decisions.

PROJECTS

Knowledge Assistant | Python, FastAPI, React, TypeScript, PostgreSQL, pgvector

- Built a company-policy search assistant with FastAPI REST APIs and React, displaying relevant source passages.
- Implemented document ingestion, version management, and hybrid keyword and vector search using MiniLM embeddings for configurable Claude retrieval-augmented generation (RAG).
- Added source-quote validation, administrator review, and role-based access controls, with 23 automated tests for document handling and data isolation.

ReKindle Relationship Intelligence | Python, scikit-learn, SQL, TypeScript, Supabase

- Built a machine learning model to predict gaps in communication for a relationship-management app using contact history.
- Achieved 0.906 ROC-AUC using scikit-learn gradient boosting, evaluated on participants excluded from model training.
- Connected model predictions to the app through TypeScript API integration, testing consistency with Python and withholding scores when contact history was insufficient.

LEADERSHIP AND ACTIVITIES

Tech Talent Pipeline Residency (CUNY) | New York, NY

Jun 2026 - Aug 2026

- Selected as 1 of 30 residents from 180 applicants for a data analytics program focused on Python, SQL, and machine learning.

CUNY 2X Tech | Hackathon Team Lead

- Selected as 1 of 40 students for a career development program connecting CIS students with NYC tech employers.
- Led an award-winning hackathon team testing AI agents through adversarial prompt engineering.
