EXPERIENCE

GHA (M&A ADVISORY)

New York, NY

Business Intelligence & Automation Analyst

Mar 2026 – Jun 2026

- Developed an LLM outreach automation agent using Claude API and live CRM data, cutting manual messaging time by 90% across 15,000+ contacts
- Authored full system documentation covering architecture, data logic, and handoff guidelines, enabling zero-session knowledge transfer to 3 stakeholders
- Designed a multi-workflow classification system using hierarchical signal logic to auto-segment and tag 45,000+ CRM records, eliminating manual tagging
- Resolved a critical pipeline data integrity issue by redesigning record-level processing logic, preventing overwrites across 20,000+ records

COLUMBIA UNIVERSITY IRVING MEDICAL CENTER

New York, NY

Data Analytics Intern

Jun 2024 – Sep 2024

- Built Power BI KPI dashboards translating clinical data into insights adopted by 2 senior leaders for weekly decisions
- Optimized ETL workflows and dashboards for large clinical datasets, reducing processing time by 30% for senior stakeholders
- Applied statistical analysis across 4 datasets to identify and resolve integrity issues, improving data accuracy by 20%

PROJECTS

BANK STATEMENT EXTRACTION AGENT – LangGraph, Claude API, Pydantic v2, Python, openpyxl

- Architected a 6-node LangGraph StateGraph agent that ingests PDF bank statements, extracts structured financial data via Claude API, validates with Pydantic v2, and outputs deduplicated Excel reports organized by statement month
- Implemented a self-healing validation loop: on schema failure, the agent fires a corrective prompt and retries automatically before escalating to human review
- Built a multi-tenant YAML config system with per-client overrides and a format discovery module that auto-generates extraction configs; hardened against prompt injection with concurrent batch processing via ThreadPoolExecutor

P&L RECONCILIATION TOOL – Python, pandas, Excel

- Produced an automated reconciliation tool matching positions across multiple portfolio management systems, flagging discrepancies by ticker, ISIN, CUSIP, or fuzzy name matching
- Generated structured Excel reports surfacing unmatched and partially matched positions, reducing manual analyst review time

SKILLS

- **Technical:** Python, SQL (BigQuery, MySQL, PostgreSQL), ETL pipelines, pandas, NumPy, data extraction & validation, Power BI, Tableau, Matplotlib, Excel, Google Sheets, Claude API (Anthropic), OpenAI API, LangGraph, LLM agent development, RAG, prompt engineering, workflow automation, CRM data integration, Streamlit, BeautifulSoup, openpyxl, Google Sheets API, Microsoft Fabric, GitHub, process documentation
- **Languages:** English, Spanish, Russian (all fluent)

EDUCATION

BARUCH COLLEGE (CUNY) – ZICKLIN SCHOOL OF BUSINESS

New York, NY

Computer Information Systems, BBA (STEM)

Expected May 2027

GPA: 3.5; Dean's List 2025-2026

LLM ENGINEERING: MASTER AI & LARGE LANGUAGE MODELS (Udemy)

In Progress – 2026

RAG pipelines, LLM agents, multi-agent systems
